"If there is any one who believes the Gold Standard is a good thing, or that it must be maintained, I want him not to cast his vote for me, because I promise him it will not be maintained in this country longer than I am able to get rid of it."—W. J. Bryan.

ON GUARD.

The LEDGER admonishes the Republicans of Amador county to be strictly on guard all along the line and every watchful. In order to elect our several candidates every Republican vote will be necessary—we must not lose one vote of our own rank and file, and should see to it that all Republicans who are registered get to the polls as early in the day on Nov. 6th as possible. While the LEDGER believes that all of our candidates have a good fighting chance to win, and that some of them are now almost as good as elected, yet we must recollect that "eternal vigilance is the price of victory" and govern ourselves accordingly. Our opponents are putting up a big fight, and we must meet them at every point. Go forward to victory in one solid phalanx, fellow Republicans.

THE distressing accident that befell R. J. Adams, our esteemed fellow townsman, last Saturday afternoon, shows how frail is the thread on which life hangs. In less time than it takes to snap the finger and thumb, this community was bereft of one of its best citizens, the Republican party of one of its ablest and ardent supporters, the Masonic fraternity of a leading member, and a happy household of a devoted father and loving husband. And to that bereaved household we will say, in the words of a popular author:

"Time gilds with gold the iron links of pain.  
There is no endless joy, no endless pain.  
A dark to-day leads into bright to-morrow.  
Remember this, all ye who walk in sorrow."

If any of the European governments that are greedy for Chinese territory figured on having the United States help them to get it, they know better now. They also know that President McKinley's idea of how to do a thing is to do it. This information was given them in the diplomatic notes from this government, which informed them that the American minister had been instructed to make the preliminary arrangements for negotiating with the peace envoys of the Chinese government.

W. R. HEARST, with his New York, Chicago and San Francisco papers, is endeavoring to move heaven and earth to elect Bryan. Why? Is it because he believes in Bryanism? Well, not altogether, but because when the 16 to 1 racket becomes in force, the Hearst silver mines will probably be worth from 16 to 20 millions more than they are at present. There is method in his madness. He is playing for high stakes.

DEMOCRATS claim to be well satisfied with the result of the recent elections in Maine and Vermont, but every person acquainted with the conditions in these States knows that the Republicans scored a tremendous victory.

CALIFORNIA is in line for McKinley and Roosevelt. This opinion prevails throughout the State, and it is not confined wholly to Republicans. Many leading Democrats concede the fact.

LABOR realizes that its interests are best protected and advanced by the sound business principles advocated and cherished by the Republican party.

THE sound business interests of the country will never support a man with the anarchistic tendencies of the Democratic nominee.

## REV. F. A. MORROW'S SERMON.

Eulogy Pronounced Over the Remains of the Late R. J. Adams.

Following is the eulogy pronounced by Rev. F. A. Morrow at the funeral of Mr. Robert J. Adams, Tuesday, October 9th, in the M. E. church, Jackson:

Companions of the Royal Arch Chapter of Masons—  
Brothers of the Blue Lodge Fraternity—  
Sisters and Brothers of the Eastern Star—  
Firemen of our city—  
Band boys of our town—  
Citizens and friends of Jackson and vicinity—

We have met to-day to pay the last tribute of respect to a loyal companion, a brother true and trusty, a friend whose memory we all delight to honor. Little did we think the last time we met with him in the Lodge and in the Chapter that never again on earth would we have his sunny presence with us. You all know what a tower of strength he was to us, because he was so faithful to duty and so obliging. In his daily life he exemplified the noble principles of our orders. He now 'eats of the hidden manna,' and he has received the 'White stone with a new name.' This would be a better world if we had more men like our deceased brother Adams.

As an itinerant minister I have lived in a good many communities and I have yet to meet with a man more generally respected and beloved than our Brother. Even the little children knew him and loved him; and many of them called him 'Papa Adams.' He always had a smile and a pleasant word for the little ones.

Children and dumb animals instinctively recognize the nature of a loving and sympathetic nature. The children loved him, and his horse has shown, since his Master's death, that he misses him and mourns for him.

One day Brother Adams and one of his boys were going home. When they got near the yard the horse saw them and whinnied. The boy said, 'That was for me.' Brother Adams said, 'Well, see' and he walked down the yard. The horse at once left the boy and followed Adams.

I might talk for hours on the good qualities of our deceased Brother but time will not permit. For the future welfare of his children Brother Adams thought and planned. At the time when he was making arrangements for his son, Jack, to study chemistry, under Professor Blackledge, I had a revelation of Brother Adams' character as a father. He opened up his heart to me and I saw the noble nature of the man who was willing to make any sacrifice for his son. It is almost impossible for the children to realize their father's anxiety for them.

Be worthy, young men, of your noble father, and never bring reproach to his honored name. Be worthy of such a father. The inheritance of his good name is better than a patent of nobility.

Of the tender love and care of Brother Adams for his only daughter I hardly know how to speak. She was the very apple of his eye. She can carry, through all her future life, the comforting thought that she had a father whose memory she need never blush.

Brother Adams' wife is indeed bereaved. Twenty-three years of wedded life they have spent together. He was always a kind indulgent husband. He took delight in providing a good home for his beloved wife and children. He had a beautiful home on earth, but I believe he has a mansion on high now.

Although Brother Adams' name was not on my church record here I fully believe it is recorded in heaven. "When the roll is called up yonder he'll be there." I am confidently expect to meet him, if I am faithful. I know whereof I speak for Brother Adams and I took a little trip up in the mountains last spring and there the angels I had with him then I know that he had settled the matter of his soul's salvation; he had accepted Christ as his personal Saviour and his affairs for eternity were settled.

How much more universally beloved it has never been my lot to meet. He has not an enemy, so far as I can learn. I think the reason is that he was such a just man, even to his political opponents.

To illustrate that—Brother Adams was Sheriff of this county for three consecutive terms. He was defeated by our present Sheriff at the last election. In talking the matter of the last election over with me he said that although Mr. Gregory had defeated him, a better man could not have been found to fill that office than Sheriff Gregory.

Is it to be wondered at that Brother Adams was so well beloved in this community, a man possessed of such a sweet spirit?

When I wished to arrange the Memorial Service for Sister Datson, I went to Brother Adams and asked him to assist me. He said, 'I am very busy just now, Brother Morrow, but I am never too busy to help a member of the fraternity.' He did, indeed, work hard to help me. His son, Robbie, made the five-pointed star, the beautiful emblem of the Grand Eastern Star, and Brother Adams, after the service, carried it to the cemetery and placed it at Sister Datson's grave.

Little did we think that we would, so soon, carry a five-pointed star to his grave.

God bless the band boys, your brother and friend is now enjoying the music of Heaven.

Our friends the firemen of this town are here to show respect to our departed Brother Adams. He was an active member of their company and none knew him but to love him. He was always one of the first to respond to the fire alarm and fearless in the performance of duty.

To show his generosity I will tell you of a private matter between us. Before my Conference met he was urging me to return to Jackson for another year. He said if I would my church would be painted for me, and if my salary got behind he, and some of the brethren, would soon rustle it up again. Do you wonder that my heart bleeds at the loss of such a friend and brother? I know that if I had wanted to borrow one thousand dollars from him he would have loaned it to me cheerfully and without interest.

I wish you to look for a few moments to the first three steps our Brother Adams took in Freemasonry. The first step he took, as an Entered Apprentice, was on February 28th, 1888. He was taught then how to divide his time into three parts—1st, eight hours for repose; 2d, eight hours to labor; 3d, eight hours to the service of God. He was also taught then how to cleanse his heart and mind from every vice, thereby fitting his body as a living stone for the spiritual edifice built by the Grand Architect of the Universe. There are many other emblems in the first step, representing human life as being chequered with good and evil, pointing to the comforts and blessings that surround us and impressing upon our minds the necessity of a reliance on Divine Providence, binding heaven to earth, the divine to the human and the infinite to the finite.

Our imperfections by nature are likewise adverted to and the state of perfection to which we hope to arrive by virtuous education, aided by the blessing of God upon our endeavors, and a due observance of the Holy Scriptures, as pointing out the whole duty of man. Indeed, everything in this first degree is adapted to impress upon the mind of the candidate the

## THE AMADOR LEDGER: JACKSON, CALIFORNIA, FRIDAY, OCTOBER 12, 1900.

McCall's Magazine.

By reference to our clubbing rates our readers will see that we furnish McCall's Magazine, an especial favorite with the ladies, and the AMADOR LEDGER, both one year for only \$2.25. Each subscriber receives a McCall Magazine pattern, which is worth at least one-fifth of the price paid. If our people desire cheap and profitable reading we are prepared to furnish it.

You can always get strictly first-class fresh fish the year round at A. B. Camerlin's Central Market.

Men's pants for \$1.00 at the Red Front. Call and see them. aug3

NOTICE IS HEREBY GIVEN BY THE Executor of the last will and testament of Henry Whiting, deceased, to the creditors of and all persons having claims against the said deceased, to exhibit them, with the necessary vouchers, within four months after the first publication of this notice to the said Executor, at the law office of W. J. McKee and F. L. Stewart, Marella Building, Court St., Jackson, Amador county, California, the same being the place for the transaction of the business of said estate, in said county of Amador.

REBECCA N. WHITING,  
Executrix of the last will of Henry Whiting deceased.  
Oct. 12-19-26-Nov. 2-9-31

## Order to Show Cause.

In the Superior Court of the County of Amador State of California.  
In the matter of the estate of Charles Hawkins, deceased. Order to show cause why order of sale of real estate should not be made.

IT APPEARING TO THIS COURT BY THE petition filed and presented and filed by Mary E. Hawkins, administratrix of the estate of Charles Hawkins, deceased, that it is necessary to sell the whole of the real estate of said deceased, to pay the expenses and charges of said estate, and to satisfy the claims of the creditors of said estate, and that it is therefore ordered by this Court that all persons interested in the estate of said deceased, appear before the said Superior Court, on Saturday, the 13th day of October, 1900, at the hour of ten o'clock a. m. of said day, at the Court Room of said Court, at the Court House in the town of Jackson, County of Amador, State of California, to show cause why an order should not be granted to said administratrix to sell so much of said real estate as shall be necessary to pay the expenses and charges of said estate, and to satisfy the claims of the creditors of said estate, and to publish in said county, once in seven days, a notice of the sale of said real estate, in said county, in said Court, this 8th day of September, 1900.

R. C. RUST, Judge.

## Assessment Notice.

MELIA GOLD MINING COMPANY—Location of principal place of business, San Francisco, California. Location of works, Amador county, California. Notice is hereby given that at a meeting of the Board of Directors, held on the ninth day of February, 1900, an assessment (No. 4) of Two and One-Half Cents per share was levied upon the capital stock of the corporation, payable immediately, in United States gold coin, to the Secretary, at the office of the company, No. 320 Sansome street, Room 4, San Francisco, California. And that at a meeting of the Board of Directors, held on the thirteenth day of July, 1900, it was ordered that, under the provisions of Section 346 of the Civil Code of the State of California, published in the laws of said State, be begun anew; and that any stock upon which this assessment shall remain unpaid on the thirteenth day of August, 1900, will be delinquent and advertised for sale at public auction; and, unless payment is made before, will be sold on TUESDAY, the 28th day of August, 1900, to pay the delinquent assessment, together with costs of advertising and expenses of sale. By order of the Board of Directors.

Office—No. 320 Sansome street, Room 4, San Francisco, California. jly3rd

POSTPONEMENT.

Ladies' fine muslin chemise, 20c, at Red Front.

Young Mothers.

Croup is the terror of thousands of young mothers, because it is so agonizing and frequently fatal. Shiloh's Cough and Consumption Cure acts like magic in cases of Croup. It has never been known to fail. The worst cases relieved immediately. Price, 25c, and 50c. For sale by A. Goldner, the Druggist.

Pat Hogan and Bryan.

"Pat," I said to Mr. Hogan, who runs our elevator, "I suppose you Tammany Irishmen are all going to vote for Bryan?"

"No, begorry, thas a lot us goin' to vote again him."

"And why?" I asked.

"Because, sor, our Priest has said a dozen times that he would call the soldiers back from Manila and have six million half-civilized Dagoes to burn up our \$20,000,000 worth of Catholic churches in the Philippines. And what would become of the 75,000 friars? What would become of our poor Priests and the thousands of Catholic converts? Why the Aguinidians would kill every Catholic priest and Catholic convert and burn every Catholic church on the island. Our Priest said so on Sunday. Vote for Bryan! It will be a sad day for our blessed Catholic religion when we vote for Bryan! We don't care about Bryan's free trade and free silver, but we mind now, the Orlist will never give him a chance to have the free killing of 75,000 Catholics in Manila. You hear Pat Hogan."

## ABOUT THE GOLD MINES

## Much Good Work Is Being Done.

## A RESUMPTION OF HYDRAULIC OPERATIONS

## Good Strikes Made Along the Tuolumne River Near Groveland.

## CALAVERAS COUNTY.

Prospect: The Duchess is on the tip of every tongue in the neighborhood, nowadays, and it is hard to get miners to talk of anything else. The Duchess quartz mines were discovered by J. P. Duggan some two years ago, about two miles southeast of Vallecito and recently sold to Emery & Lilly of Indiana, who are at present thoroughly developing the mines under the able management of Greene H. Lewis. Mr. Lewis is well known throughout Calaveras and Tuolumne counties as an energetic and practical miner and a man who will open up a prospect into a paying proposition if there is any pay in it. The company have just completed a wagon road to the mine at a cost of perhaps \$3,000; also dug about four miles of ditch and are at present drilling flumes and laying pipe preparatory to running an air compressor and drilling machines, which have been put in place during the summer, and as soon as water can be obtained a 3000 foot tunnel will be driven into the mine tapping the vein some 700 or 800 feet deep. There has recently been run a tunnel about 1000 feet deep, and it is estimated that the vein of ore, some of which is valued at \$2,000 per ton. A 75-foot shaft has also been sunk on the vein with flattering prospects. A force of miners are now sinking a shaft on the south chute.

A fine gold placer mine owned by A. Lundberg and has been identified with a force of miners are kept constantly digging gravel, which prospects way up. This mine has the name of paying the largest dividends of any mine in this vicinity.

Work was commenced this week on the Swartz mine near Bear Mountain. The mine is at present in the hands of San Francisco parties and has shown some good prospects. Six men have been put to work and a shaft will be sunk to develop the mine.

Mr. Lake, who is operating in Echo district and has been identified with the Cataract and Wide West gravel company, and served the company over a quarter of a century as its secretary in San Francisco, has never lost faith in the gravel deposit lying underneath Catalina and is now and has been giving his attention to improvements there all summer, and will, when water can be had the coming season, again place pipe in position on the property for the fourth or fifth time, and resume hydraulic operations. He is at first start he intends to pipe Coarse Gold gulch from the bottom to the head which no doubt will yield handsome returns, as in years gone by the pay was in fine coarse and the gold. In this table mountain range a few miles west of Echo, the deep shaft, over 400 feet deep, was sunk in 1856. It was in gravel its entire depth. No bottom was reached.

One of the proprietors of the Big Horn mine near El Dorado, was up from Frisco and visited the mine last week. Work is instituted with a view of making this mine a milling proposition soon as can be done.

## TUOLUMNE COUNTY.

Articles of Incorporation of the Genevieve Mining Company were filed in the County Clerk's office last Tuesday. Principal place of business San Francisco. Seven directors: W. P. Scott, S. J. McKinnley, J. M. McVern, Marshall B. Woodworth, Thos. Carroll, Wm. Royal, A. H. Warren, and Eugene Carroll of San Francisco. Capital stock \$250,000 with shares at \$2.50 each.

A thousand feet of steel rail is at the Swartz mine near El Dorado, Cal., to be used in the tunnel. On account of the early rains the company will not build the mill until next spring, as the condition of the roads will make the transportation of the necessary material impossible until then. The new shaft of one recently struck continues in richness upon being developed.

Work on the Hard Tack was stopped last week and in consequence there is considerable water in the shaft at present. Supt. McCarren has the mine pumped out in motion this week. The mine will soon be in good working order.

New Era: Some very good strikes have recently been made in a series of claims along the Tuolumne river, within a few miles of Groveland, by Cleveland. A considerable quantity of the rock was very rich.

The new shaft on the Longfellow mill in a few shifts more break into the prize that was started from the 350 foot level to meet the working of the linking mines. The property looks bright.

At the Rhode Island near Groveland, the main shaft has reached a depth of 35 feet, additional sinking being accomplished at the rate of 3 feet per day. The vein shows from 7 to 8 feet of good quartz.

Operations have been resumed at the "General Union" mining property, which has been in operation for some time in progress. As 200 cords of wood have been ordered delivered at the mine it would seem that the company plans to go after the ore in dead earnest.

From all indications it would appear that Holland & Co. have under way a long predicted bonanza in the tunnel. Old miners—especially those familiar with the surrounding country—ways said that whenever depth was gained the tunnel would yield barrels of gold. The latter prophecy has as yet failed of fulfillment, but the mine is showing up significantly and rapidly rounding to one of the best on the East Belt. The work now being stripped is strong and rich.

Everything is progressing favorably at the Providence, although the lack of water has reduced the force to a mere fraction of its usual number. At a level, 900 feet from the surface, the vein is being put out, at the same time upraising being prosecuted from 6, to 5, and 5 to 4. Owing to a break-down in the machinery, the company's saw-mill was compelled to stop down for a few days the first of the week, but the necessary repairs are made and sawing resumed yesterday.

## EL DORADO COUNTY.

Nugget: Marcellus L. Smith is down at the Rosebud mine near Fairplay, says the mine is looking well and he well pleased with what he has developed there. At the present time buildings are being put up for additional shelter for the winter. A live-stamp mill will be completed in the mine and be in readiness for operation this fall.

## REPUBLICAN CLUB MEETING.

W. J. Barrett, Republican Nominee for Presidential Elector, Addressed the Club. Last Wednesday evening the Republican Club of Jackson met in Webb Hall. During the meeting the Club was addressed by W. J. Barrett, Republican nominee for Presidential elector. Mr. Barrett spoke most eloquently and quite forcibly upon the statements issued by Democratic newspapers, and uttered by Democratic orators that give the people to understand that all traveling commercial men are supporters of Bryan. Mr. Barrett is himself a commercial man and is ex-President of the Pacific Coast Commercial Travelers' Association and Past Councilor of Los Angeles Council No. 82, U. C. T., and says that in his tour of the whole State he has not found more than half a dozen traveling commercial men supporting Wm. Jennings Bryan. Mr. Barrett has been traveling as a commercial man for years and being of such rank in the Association is in close touch with his fellow travelers, and says the votes of the commercial travelers will be cast with the Republican ticket for McKinley and Roosevelt on next Nov. 6th.

## Death of Orsino Tam.

The news of the death of Orsino Tam of Volcano, was received by his brother Wm. Tam, last Sunday evening about 7:30.

Later advice stated that Mr. Tam had died of dropsy while on a visit to San Francisco. He was a native of Italy, aged about 60 years and came to Volcano from that country in the early 60's. For some time he worked on a gravel mine, and then he located, several years later, and upon the same place, during the summer, and as soon as water can be obtained a 3000 foot tunnel will be driven into the mine tapping the vein some 700 or 800 feet deep. There has recently been run a tunnel about 1000 feet deep, and it is estimated that the vein of ore, some of which is valued at \$2,000 per ton. A 75-foot shaft has also been sunk on the vein with flattering prospects. A force of miners are now sinking a shaft on the south chute.

Decayed was a native of Italy, aged about 60 years and came to Volcano from that country in the early 60's. ## DEATH OF R. H. ADAMS

## Electrocuted While Stringing Wires.

## HIS DEATH A SHOCK TO THE COMMUNITY

## Very Impressive Ceremonies of the Fraternity During the Funeral Services.

The first fatality from the electric wires, which are strung so thickly through the town of Jackson, occurred on Saturday last, the victim being Robert H. Adams, superintendent and manager of the Amador Electric Railway and Light Co. for Jackson. Ever since the Electric Company commenced business in this town, in 1893, Mr. Adams had been engaged in the general supervision of the company's affairs here. Being careful and reliable, and naturally quick in acquiring a knowledge of anything he undertook, he soon became expert in the practical work of the electric lighting business, and all the dangerous work was done by him personally.

Last Saturday he was engaged all day in installing a number of incandescent lights at different points about town for the purpose of illuminating the town. He was working on a line of wires, which he had strung up, and was about to connect them to a line of wires, when he was struck by a live wire. He fell to the ground, and was killed instantly.

Mr. Adams was a native of California, and was a member of the Amador Electric Railway and Light Co. for Jackson. He was a very capable and reliable man, and his death is a great loss to the community.
